Security Business Value Assessment

Combat threats at every level

With an increasingly complex security landscape, organizations are struggling to prioritize and analyze the overall risk posture for their IT environment.

Avanade's Business Value Assessment can help provide IT and security leaders a strategic view of risk across their enterprise and define proactive ways to protect their business from growing cyber threats like ransomware, insider threats and vulnerabilities.

94% of enterprises are missing up to 20% of endpoints

Real-time threat detection and prevention

Avanade can help you develop a strategy for real-time, scalable data and actionability through our 2-to-4-week Business Value Assessment.

Focused on Microsoft maturity and cyber risk reduction, it helps to target C-Level threats through end-to-end visibility, real-time threat identification, and vulnerability remediation to prevent breaches and delivers:

1. Complete and real time visibility

2. Patching with speed and scale

3. Reduced silos between operations and security

4. Cost savings

Identify and address strategic pain points

Avanade delivers advisory and consulting services to pinpoint and resolve strategic pain points. In collaboration with your designated local delivery teams, the project unfolds through four key steps:

1. Gather input and goals, emphasizing crucial business drivers, board initiatives, and strategic investments.
2. Develop a strategy by reviewing the current Microsoft implementation.
3. Present recommendations, including an initial proof of concept utilizing the Tanium platform.
4. Review Value Realization, incorporating key inputs, recommendations, and mapped-out timelines.

Solution

Services:

- 2-to-4-week Microsoft maturity and cyber risk reduction assessment
- Drive operational efficiency, lower costs, and enable growth with insights and resource identification
- Rationalization and consolidation for improved outcomes with defined metrics

----

Activities

Proposed Strategy (3-5 days):

- Review existing Microsoft implementation, EDR deployment, and architecture
- Data-driven risk analysis for accuracy
- Build maturity model (compliance, vulnerability, tool rationalization)
- Target areas: Azure migration ROI, Win11 readiness, Sentinel integration

Develop recommendations & Pilot (2-5 days):

- Recommend integration in pre-production and/or production environments
- Perform Tanium Risk Assessment to identify IT operations/cybersecurity gaps

Value Realization Roadmap (1 hour):

- Executive report presenting key findings and recommendations
- 90-day strategic roadmap for next steps

Outcomes:

- Improved Microsoft implementation maturity and utilization
- Identified cybersecurity architecture gaps
- Enhanced Microsoft maturity program roadmap
- Proof of concept and value realization findings presented

Why Avanade & Tanium

At Avanade, we're the experts at helping you secure your Microsoft and hybrid IT ecosystems. Our security services provide a holistic approach through advisory, implementation and managed services. Tanium's technology integrations and Avanade's platform expertise help our joint customers find the most value in their Microsoft investments to:

- 2x winner of the Microsoft Security Zero Trust Champion Award
- Microsoft 2023 Partner of the Year - **Global System Integrator (GSI) Award** - for the 18th time
- Microsoft Advanced Specializations in Cloud Security, Information Protection & Governance, Threat Protection and Identity & Access Management
- Leader in IDC MarketScape: Worldwide Cybersecurity Consulting Services 2024 Vendor Assessment
