TANIUM.

Certifying the backend

The connected vehicle ecosystem

Business model disruption. Supply chain risk. Regulatory pressure. Electrification deadlines. Among the host of challenges facing the auto industry, we must also find a way to manage and secure the connected vehicle ecosystem.

With the next generation of vehicles, the accountability for safety, operability, and performance changes significantly. Much of it lies in the ecosystem surrounding the vehicle. Spanning multiple technology domains, this backend is largely comprised of IT infrastructure.

How does Tanium help?

Many of the largest companies in the world trust Tanium to manage and protect their IT estates. Tanium, the industry's only provider of Converged Endpoint Management (XEM), leads the paradigm shift in legacy approaches to managing complex security and technology environments.

Tanium up-levels every team, endpoint, and workflow by integrating IT, Security, Risk, and Compliance into a single platform that delivers comprehensive visibility across devices, a unified set of controls, and a common taxonomy. Protect your critical information and infrastructure at scale.

Beyond risk and compliance

Tanium clients also leverage the power of the platform to generate business value in the areas of M&A, supply chain, and operational efficiency.

Future-proof the backend

To succeed in the world of EV and AV, cloud and edge, disruption and compliance, we must have comprehensive visibility and control of the backend infrastructure. That means eliminating tech debt, mastering first- and third-party risk, and breaking down silos previously impenetrable.

Imagine a certified future where automated compliance is the norm, powered by integrated platforms with a real-time stream of data, flowing from the supply chain to the assembly line to the kindergarten drop-off. Tanium is driving transformative change by partnering with key platforms across the ecosystem.

Let's drive the secure future together. Ask us about solutions and partnerships. **automotive@tanium.com**

Tanium customers:

- 70% of the Fortune 100
- 5 U.S. departments of defense
- 30M+ endpoints managed and secured
- 8 of 10 top US financial institutions.
- 7 of the top 10 global retailers
