

Tanium Benchmark

Compare and prescriptively improve your IT risk metrics against your industry peers.

Tanium Benchmark is the only solution that provides real-time risk comparisons to industry peers. Benchmark uses more than 20 different metrics to provide a comprehensive view of risk posture, so that teams can prioritize risks across the entire attack surface and take action to remediate those findings. Use the same data to power your board reports and accomplish your IT goals.

The need for security metrics

Customers tell us that the Board of Directors needs more visibility into their organization's security metrics and risk posture. What their current tools lack is the ability to provide executive level reporting while at the same time providing administrators clarity on the tactical steps needed to meet security goals.

The attack surface of organizations has rapidly expanded over recent years due to digital transformation initiatives.

Organizations are missing a unified solution to identify risks and mitigate them in real-time.

Siloed tools can't deliver current, accurate, comprehensive, or contextual data. That means IT and security leaders can't:

- Compare IT risk against industry peers
- Set goals for remediation efforts that tie to board-level leadership's security objectives
- Pivot to action once risk is understood

Can you answer these questions with certainty?

- As a leader, how do you know if you are doing a good job securing your data?
- How are you creating an actionable plan to mitigate risk after seeing metrics that are performing worse than industry peers?
- Are you able to remediate your findings in real-time from the same console or do you have to send a ticket for another team to fix the issues days or weeks later?

**Meet Tanium™ Benchmark:
a single tool to measure,
prioritize and reduce
the attack surface**

Visibility

See into every endpoint, managed or unmanaged, with complete, accurate and real-time visibility.

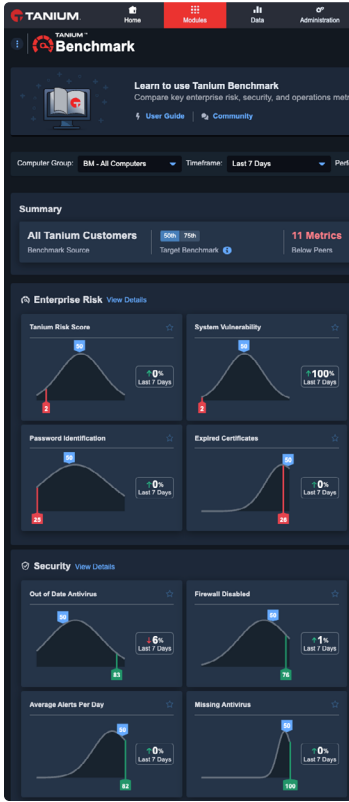

Control

Shrink your attack surface through patch and configuration management at scale.

Remediation

Investigate and fix IT Operations, Risk, and Security needs in real time.

See exactly where your organization ranks relative to your industry peers.

68%

of survey respondents agree that IT teams could do more to make sure senior executives are better informed about their organization's cyber risk and cybersecurity.

Leaders can be confident in trusting Benchmark to measure and secure their organization

Promote cross-team collaboration and understanding.

Reports, risk scores and benchmarks improve understanding and insight.

Eliminate disparate information between teams with a single, accurate and impact-based view of risks. Intuitive visualization helps align senior stakeholders to value delivered by IT and security.

- Executive reports chart progress on risk and allow team members to collaborate
- Holistic risk scoring drives continuous awareness of endpoint security posture
- Real-time feedback about endpoints for IT Operations and security

Identify and understand your IT risk by benchmarking your cyber hygiene against your peers.

Get real-time information on all your endpoints and identify vulnerability and compliance gaps.

Identify risk without overloading the network or relying on after-hours scanning. Automatically leverage the modules already in place as well as additional sensor data, such as from CPU architecture and TLS/SSL Core content.

- Risk scoring for system vulnerability, compliance, admin access, and more
- Simple view of highest risk endpoints and remediation steps
- Industry benchmarks and intuitive dashboards/graphs enhance senior stakeholder understanding

Minimize your attack surface.

Improve your cyber hygiene to minimize endpoint cyber risk.

Organizations need a more intelligent and accurate way to prioritize security spending and share actionable insight with leadership. Shrink your attack surface by managing patches, software updates, configurations, and more at scale in one platform.

- Actionable planning to tackle risk
- Set goals that tie to leadership objectives
- Clear metrics to focus remediation

Tanium Benchmark is a key component of Tanium's Converged Endpoint Management (XEM) platform

The Tanium platform offers comprehensive IT operations and security management from a single agent. It delivers complete, accurate and real-time endpoint data, regardless of scale or IT complexity and using minimal infrastructure. Tanium XEM provides the visibility and control you need to continuously manage endpoint risk.

Tanium, the industry's only provider of Converged Endpoint Management (XEM), leads the paradigm shift in legacy approaches to managing complex security and technology environments. Only Tanium protects every team, endpoint, and workflow from cyber threats by integrating IT, Compliance, Security, and Risk into a single platform that delivers comprehensive visibility across devices, a unified set of controls, and a common taxonomy for a single shared purpose: to protect critical information and infrastructure at scale. More than half of the Fortune 100 and the U.S. armed forces trust Tanium to protect people; defend data; secure systems; and see and control every endpoint, team, and workflow everywhere. That's the power of certainty.
