

Tanium Certified Specialist Cloud Deployment (TCSCD)

SKU: TAN-EXAM-TCSCD | Exam Code: TAN-4100

This advanced certification serves to validate an individual's knowledge around qualifying, planning, setting up, and operationalizing Tanium Cloud customer deployments.

FORMAT	SCORE POINTS	SEAT TIME
Multiple choice and simulation items	60	105 minutes

Candidate profile

A Tanium user with foundational understanding of the operation and management of Tanium.

The candidate has a minimum of 6–9 months of familiarity using administrative functions at a junior level within Tanium and at least 3 months (or equivalent training) using Tanium Cloud or deploying new Tanium Cloud instances.

Exam blueprint

Review the blueprint to learn what to expect and help you prepare. It provides general guidelines for the content likely to be included on the exam. Related topics may also appear on any specific delivery. Blueprints may change at any time without notice.

PRE-DEPLOYMENT

32%

- Identify partner vs customer roles and responsibilities
- Describe the Tanium Cloud high level architecture
- Given a scenario, evaluate candidacy for Tanium Cloud
- Apply procedural concepts to establish IdP requirements and compatibility
- Identify configuration requirements
- Given a scenario, determine appropriate compliance resources for customer compliance requirements
- Identify key Tanium Cloud differentiators vs non-Cloud

DEPLOYMENT

38%

- Follow Tanium Cloud deployment timeline and tasks
- Implement client security exclusions
- Apply procedural concepts to support connecting to IdP
- Develop and follow client deployment plan
- Configure RBAC for initial use
- Create computer groups
- Deploy Tanium client to endpoints

POST DEPLOYMENT

30%

- Identify future Tanium use cases
- Perform post deployment tasks
- Determine when to contact Tanium support
- Given a scenario, troubleshoot common Tanium client issues
- Use tools to gain client visibility
