

Federal Cyber Tools: Is Quantity the Enemy of Quality?

MeriTalk, in partnership with Tanium, surveyed 100 Federal cybersecurity managers in January 2021 to explore agencies' tools rationalization progress.

Security Point Tool Proliferation

How many security tools does your agency have?

Just **one in three** say their utilization rate is above 50%

More Tools Don't Equate to Better Data

Few are completely confident with their tools' ability to provide:

Security Tool Rationalization

99% of Federal cybersecurity managers say they are working to rationalize and consolidate their tools

Top drivers:

Top Factors for Risk Reduction

- Compliance governance and policy
- Tools rationalization/consolidation
- End user training
- Visibility across the enterprise
- Real-time data
- Supply chain management
