

Tanium for Local Government

Why Tanium for Local Government?

County, city, and municipality administrations are tasked with serving citizens and businesses by providing accessible services, engaging constituents, expanding economic opportunities, and improving crisis response. But these priorities are difficult to achieve when local governments face challenges from strained budgets, operational inefficiencies, dispersed and overburdened staff, data privacy and regulatory constraints, and cybersecurity and ransomware threats. As a result, gaps emerge in the security, monitoring and management of the endpoints that government employees rely on for their daily work.

To close these gaps, governments need endpoint management and security tools that provide the visibility and control required for managing endpoints efficiently, improving and accelerating incident response, and practicing strong IT hygiene at scale. The Tanium Platform meets the most stringent endpoint management and security assessment requirements for asset visibility, tool and cost optimization, data privacy and incident response, so governments can build secure, Zero-Trust environments quickly and affordably.

Asset Visibility

Sight: Discover and manage assets. Distribute, manage and report on patching across your environment.

Tool & Cost Optimization

Savings: Consolidate, rationalize cost, reclaim underutilized tools to optimize efficiencies and investments, with less setup time.

Secure Data Privacy

Secure: Identify, categorize, and manage constituent's sensitive data to help meet privacy regulations.

Incident Response

Speed: Quickly identify, investigate, contain and remediate incidents with access to comprehensive live data.

Schedule a no-obligation Business Value Assessment at try.tanium.com to simplify your endpoint management and security mission critical programs.

Tanium unifies Local Government endpoint management and security through unparalleled speed, visibility, and control, at scale.

Identify and protect managed and unmanaged devices, to respond and recover from threats and breaches.

Manage inventory, monitor, contextualize and remediate end-user, server and cloud endpoints with ultimate visibility and control at scale.

About Us

Tanium offers a unified endpoint management and security platform that is built for the world's most demanding IT environments. Many of the world's largest and most sophisticated organizations, including nearly half of the Fortune 100, top retailers and financial institutions, and several branches of the US Armed Forces, rely on Tanium to make confident decisions, operate efficiently and effectively, and remain resilient against disruption. Tanium has been named to the Forbes Cloud 100 list of "Top 100 Private Companies in Cloud Computing" for five consecutive years and ranks 10th on FORTUNE's list of the "100 Best Medium Workplaces."
