## **Tanium success**

Whether you're just getting started or ready to expand your skills and knowledge of Tanium, our comprehensive training will show you how to fulfill your goals at speed and scale.

Participants gain an increased proficiency in Tanium's technology and will be equipped with the core knowledge to be successful.

## Tanium training

Tanium training provides enhanced knowledge and understanding of Tanium products, and gives users the confidence they need to expand their abilities and get the most out of their Tanium deployment.

### Three ways to learn

- Web-based training (WBT)
- Instructor-led training (ILT)
- Virtual instructor-led training (vILT)

Training courses are offered either on site at your location or remotely through virtual classrooms. Both options provide valuable knowledge through live instruction and reinforce what is taught with hands-on labs in a Tanium-provided environment. Self-paced training is also available.

### Qualified trainers

Training classes are conducted by qualified Tanium instructors utilizing standardized curriculum alongside their in-depth, real-world expertise and knowledge of customer needs and priorities.

Attendees capitalize on the expertise Tanium's Technical Account Managers (TAMs) provide in training classes to cultivate the knowledge, skills, and proficiency needed in their jobs. Due to their close working relationship with customers, TAMs are unsurpassed in their capability to convey the key aspects of Tanium, and ensure attendees are provided the best possible training experience.

### Audience

Tanium role-based training is geared toward the following users in your organization:

- All Tanium users
- Operations users
- Risk users
- Security users
- Tanium administrators

## Getting Started With Tanium

This course introduces learners to the Tanium Core Platform and core functionalities. By the end of this course, you will be able to use Interact to ask questions and alter endpoints, create Trends boards to visualize information about your environment, and create connections to export information from Tanium to other platforms. This course will also provide a brief introduction to Tanium's solutions for operations, risk, and security teams.

### Topics include

- Introduction to Tanium's Topology
- Access the Tanium Console
- Use Interact to ask questions and alter your endpoints
- Visualize data with Trends
- Create connections
- Introductions to Operations, Risk, and Security modules

### Audience

All Tanium Users

### Length

80 Minutes (Web-Based Training)

1 Day (Instructor-led (Onsite or Virtual Classroom))

### Delivery

Instructor-led (Onsite or Virtual Classroom) Web-Based Training

## Tanium Advanced Threat Response

Tanium's Advanced Threat Response training is designed for security incident response practitioners investigating breaches involving lateral movement, fileless attacks using "living off the land" methods, injected code, and data exfiltration. Students will benefit from hands-on experience with Tanium Threat Response including Sensors, host-level forensic timelines, analysis of acquired files, memory analysis techniques for finding common injection tradecraft, use of intelligence such as Tanium Signals, and Indicators of Compromise.

### Topics include

- Overview of Threat Response capabilities
- Threat Response Components and Sources of Evidence
- Sort, filter, and review Threat Response alerts
- Host investigations and remediation
- Develop and apply threat intel with signal and IOCs

### Audience

Security Users

### Length

1 Day

### Delivery

Instructor-led (Onsite or Virtual Classroom)

## Tanium Advanced Content

This course will show you how to apply your existing scripting knowledge to more in-depth techniques within the Tanium Environment. By the end of this course, you will be able to explain how content runs on Tanium endpoints and how it can impact endpoint devices. This course will walk you through creating and testing content using Tanium's recommended best practices.

### Topics include

- Create and test sensors using Tanium's recommended content and security best practices
- Minimize content strain on the Tanium Server
- Risks of using third-party content

### Audience

Security Users

### Length

1 Day

### Delivery

Instructor-led (Onsite or Virtual Classroom)

## Tanium Essentials 7.4.5

The Tanium Essentials course is an immersive three-day training covering the primary operational use cases of the Tanium Core Platform and modules. Participants learn how to use Tanium's powerful abilities to gain valuable network visibility, assess potential risks, plan for threat remediation, and empower security and IT operations teams to continuously secure, control, and manage every endpoint at speed and scale. Topics include the primary operational use cases of the Tanium core platform and these modules: Interact, Connect, Trends, Discover, Asset, Deploy, Patch, Threat Response, Enforce, Performance, Comply, Integrity Monitor, Reveal, Map and Impact

### Topics include

- Access and navigate the Tanium environment
- Effectively ask questions to gather information about the network environment
- Effectively identify circumstances in the environment where Tanium can leverage positive change
- Demonstrate primary use cases for each Tanium module

### Audience

All Tanium Users

### Length

3 Days

### Delivery

Instructor-led (Onsite or Virtual Classroom)  
Web-Based Training

## Tanium Administrator

Intended for administrators with at least six months of experience using Tanium, this comprehensive and hands-on course prepares Tanium administrators to strategically review, analyze and troubleshoot Tanium performance concerns using a variety of tools such as the System Status Page, Info Page, Question and Action History, Tanium Health Check and basic TanOS administration.

### Topics include

- Manage permissions and computer groups
- Review, analyze, and troubleshoot Tanium platform issues
- Import the Tanium manifest

### Audience

Tanium Administrators

### Length

1.5 Days

### Delivery

Instructor-led (Onsite or Virtual Classroom)  
Web-Based Training

## Tanium Certified Professional Operations

After this course, you will be able to perform functions such as installing, updating, and troubleshooting these Tanium modules: Asset, Deploy, Discover, and Patch. Participants will learn how to use module abilities to achieve specific results through creating and managing content, as well as configuring settings and integrations.

### Topics include

- Install, upgrade, and uninstall Tanium's Operations suite of modules
- Utilize modules' advanced functionalities to create change and operational efficiency in your enterprise
- Troubleshoot common module issues

### Audience

Operations Users

### Length

11 Hours

### Delivery

Web-Based Training

## Tanium Certified Professional Risk

After this course, you will be able to perform functions such as installing, updating, and troubleshooting these Tanium modules: Comply, Integrity Monitor, and Reveal. Participants will learn how to use module abilities to achieve specific results through creating and managing content, as well as configuring settings and Integrations.

### Topics include

- Install, upgrade, and uninstall Tanium's Risk suite of modules
- Utilize modules' advanced functionalities to effectively monitor for risk and compliance issues in your enterprise
- Troubleshoot common module issues

### Audience

Risk Users

### Length

10 Hours

### Delivery

Web-Based Training

## Tanium Certified Professional Security

After this course, you will be able to perform functions such as installing, updating, and troubleshooting these Tanium modules: Enforce and Threat Response. Participants will learn how to use module abilities to achieve specific results through creating and managing content, as well as configuring settings and integrations.

### Topics include

- Install, upgrade, and uninstall Tanium's Security suite of modules
- Utilize modules' advanced functionalities to protect endpoints and respond to threats
- Troubleshoot common module issues

### Audience

Security Users

### Length

8 Hours

### Delivery

Web-Based Training

## Working With Tanium Asset

After this course, you will be able to perform functions such as installing and updating Tanium Asset™ (Asset), creating custom reports, exporting data to third-party sources such as ServiceNow and Flexera, and troubleshooting common Asset issues.

### Topics include

- Install, upgrade, and uninstall Asset
- Configure, disable, and delete sources and attributes
- Export and import data
- Troubleshoot common Asset issues

### Audience

Operations Users

### Length

2 Hours

### Delivery

Web-Based Training

## Working With Tanium Deploy

After this course, you will be able to perform functions such as installing and updating Tanium Deploy™ (Deploy), creating and deploying software packages and bundles, setting applicability checks, configuring maintenance windows, empowering users with self-service tools, and troubleshooting common Deploy issues.

### Topics include

- Install, upgrade, and uninstall Tanium's Security suite of modules
- Utilize modules' advanced functionalities to protect endpoints and respond to threats
- Troubleshoot common module issues

### Audience

Operations Users

### Length

3 Hours

### Delivery

Web-Based Training

## Working With Tanium Discover

After this course, you will be able to perform basic functions such as installing and updating Tanium Discover™ (Discover), creating labels to group interfaces, altering the way tables appear, and troubleshooting sensor and profile issues.

### Topics include

- Install, upgrade, and uninstall Discover
- Use Discover's tables and location features
- Troubleshoot common Discover issues

### Audience

Operations Users

### Length

3 Hours

### Delivery

Web-Based Training

## Working With Tanium Patch

After this course, you will be able to perform functions such as installing and updating Tanium Patch™ (Patch), creating scan configurations, managing and deploying patches, setting maintenance windows, and troubleshooting common Patch issues.

### Topics include

- Install, upgrade, and uninstall Patch
- Create and enforce scan configurations
- Create a Patch deployment template
- Troubleshoot common Patch issues

### Audience

Operations Users

### Length

3 Hours

### Delivery

Web-Based Training

## Working With Tanium Comply

After this course, you will be able to perform functions such as installing and updating Tanium Comply™ (Comply), deploying benchmarks, creating custom checks, and troubleshooting common Comply issues.

### Topics include

- Install, upgrade, and uninstall Comply
- Create custom checks
- Create Comply deployments
- Manage report attributes
- Troubleshoot common Comply issues

### Audience

Risk Users

### Length

3 Hours

### Delivery

Web-Based Training

## Working With Tanium Integrity Monitor

After this course, you will be able to perform functions such as installing and updating Tanium Integrity Monitor™ (Integrity Monitor), creating customized watchlists, creating Integrity Monitor integrations, and troubleshooting common Integrity Monitor issues.

### Topics include

- Install, upgrade, and uninstall Integrity Monitor
- Import and configure customized watchlists
- Integrate Integrity Monitor with third-party software
- Troubleshoot common Integrity Monitor issues

### Audience

Risk Users

### Length

5 Hours

### Delivery

Web-Based Training

## Working With Tanium Reveal

After this course, you will be able to perform functions such as installing and updating Tanium Reveal™ (Reveal), using rules and rule sets, and troubleshooting common Reveal issues.

### Topics include

- Install, upgrade, and uninstall Reveal
- Create a new regex pattern
- Deploy custom Reveal content
- Troubleshoot common Reveal issues

### Audience

Risk Users

### Length

2 Hours

### Delivery

Web-Based Training

## Working With Tanium Enforce

After this course, you will be able to perform functions such as installing and updating Tanium Enforce™ (Enforce), creating baseline policies, and troubleshooting common Protect issues.

### Topics include

- Install, upgrade, and uninstall Enforce
- Create and enforce BitLocker and FileVault policies
- Create advanced native operating system security control and remediation policies
- Troubleshoot common Enforce issues

### Audience

Security Users

### Length

3 Hours

### Delivery

Web-Based Training

## Working With Tanium Threat Response

After this course, you will be able to perform functions such as installing and updating Tanium Threat Response™ (Threat Response), finding and remediating compromises, and troubleshooting common Threat Response issues.

### Topics include

- Install, upgrade, and uninstall Threat Response
- Create a custom signal
- Create and deploy threat intelligence
- Hunt and respond to threats in your enterprise
- Troubleshoot common Threat Response issues

### Audience

Security Users

### Length

5 Hours

### Delivery

Web-Based Training

## Next steps

For more information regarding Tanium training visit [Tanium.com/training](https://www.tanium.com/training). To inquire about scheduling a class, please contact your Tanium representative.

Tanium is the platform that organizations trust to gain visibility and control across all endpoints in on-premises, cloud and hybrid environments. Our approach addresses today's increasing IT challenges by delivering accurate, complete and up-to-date endpoint data — giving IT operations, security and risk teams confidence to quickly manage, secure and protect their networks at scale. Tanium's mission is to help see and control every endpoint, everywhere. That's the power of certainty.
