Tanium Autonomous Endpoint Management (AEM)

Tanium AEM empowers IT and security teams to identify, manage and execute change safely and reliably in their environment - at scale, with confidence, and in real time.

Today's IT environments are increasingly complex, often burdened by inefficient legacy systems and siloed data, leading to security risks and operational disruptions. Tanium AEM leverages AI-driven insights from real time endpoint data to automate IT and security operations, ensuring changes are executed with confidence.

Built on Tanium's patented real time platform, Tanium AEM provides an integrated suite of capabilities, including:

- Real time Asset Discovery and Inventory
- Risk & Compliance
- Endpoint Management
- Threat Hunting & Incident Response
- Vulnerability Management
- Digital Employee Experience

Tanium's ecosystem integrates seamlessly with ServiceNow's CMDB and IT and Security workflows, and Microsoft's security and infrastructure solutions, maximizing the value of existing investments.

By automating IT and security operations through intelligent automation powered by AI and real time data, Tanium AEM enhances operational efficiency, strengthens security, and reduces complexity and costs.

Boilerplate

Tanium Autonomous Endpoint Management (AEM) offers the most comprehensive solution for intelligently managing endpoints across industries, providing capabilities for asset discovery and inventory, endpoint management, vulnerability management, risk and compliance, threat hunting & incident response, and digital employee experience. The platform supports 34M endpoints worldwide, including 40% of the Fortune 100, delivering increasingly efficient operations and an improved security posture at scale, with confidence, and in real time. Key use cases for Tanium by solution areas:

Tanium Core (common platform):

- Real time Asset Discovery and Inventory
- Autonomous foundations and controls
- Identify and remediate zero-day and emerging risks

Tanium Endpoint Management

- OS patching and software management
- Device provisioning
- Policy management

Tanium Risk & Compliance

- Vulnerability assessment, prioritization, and remediation
- Compliance tracking and reporting
- Sensitive data monitoring

Key use cases

- Tanium Incident Response
- Threat hunting with speed and scale
- Incident Investigation, Response, and Recovery
- Identify lateral movement risk
