

# Prevention is better than the cure

Tanium commissioned research to analyse the reactive approach IT leaders adopt when dealing with the consequences of cyberattacks.

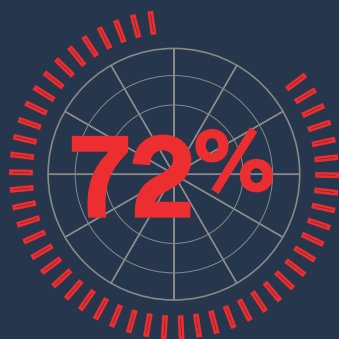

of IT decision makers expect 2022 to be the **worst year yet** in terms of the number of attacks we will be facing\*

believe cyberattacks are avoidable, with **unpatched devices** named the **most preventable** problem\*

## AND YET:

of businesses will continue to take a **reactive approach** to cybersecurity in 2022\*

of businesses have been using **risk analysis tools** for **five years or more**\*

### A recent Tanium Risk Assessment uncovered concerning pitfalls for one organisation:

**500+**

endpoints not running AV

**40+**

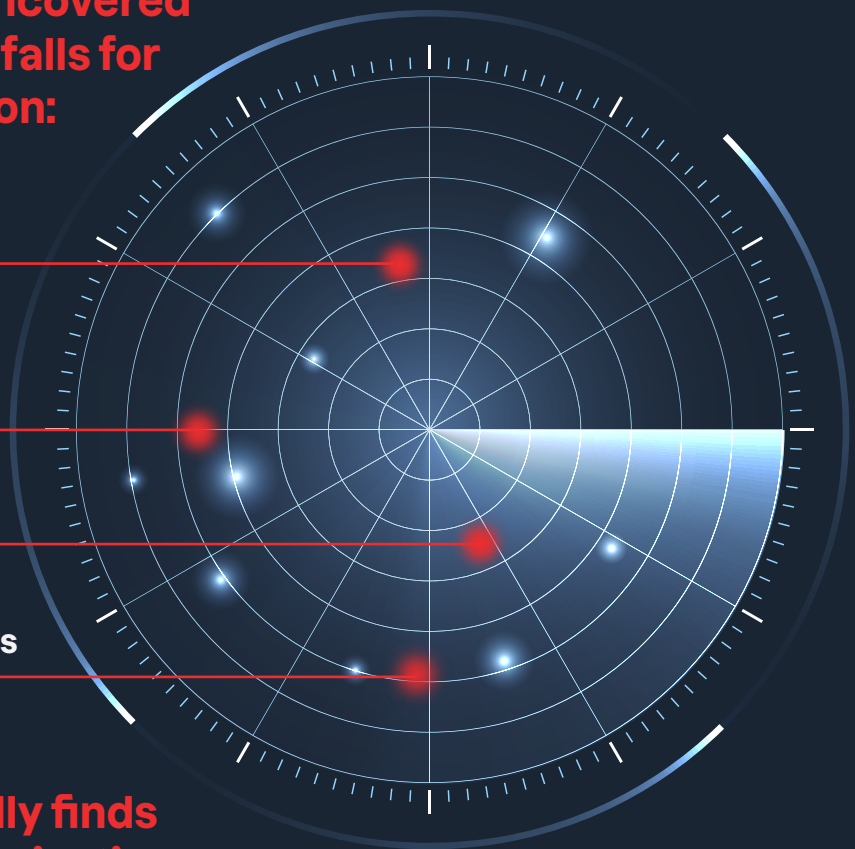

endpoints exposed to Log4j vulnerability

**750+**

endpoints with uptime of 30+ days

**25+**

endpoints with hostname collisions

Tanium typically finds that most organisations uncover an additional **12–20% of endpoints** that were previously unknown and unmanaged.

**84%**

Recent research found that 84% of IT Professionals believe it costs more to recover from a cybersecurity incident than to prevent one.\*

### Tanium can provide you with:

A composite risk score

A full Log4j exposure analysis

An executive summary of risk

A proposed implementation plan

Assess the risk of all your endpoints against multiple vectors – vulnerabilities, threats, compliance, patch status, sensitive data, and susceptibility to large-scale breach patterns, such as Log4j – in just five days at no cost.

Tanium, the industry's only provider of converged endpoint management (XEM), leads the paradigm shift in legacy approaches to managing complex security and technology environments. Only Tanium protects every team, endpoint, and workflow from cyberthreats by integrating IT, Compliance, Security, and Risk into a single platform that delivers comprehensive visibility across devices, a unified set of controls, and a common taxonomy for a single shared purpose: to protect critical information and infrastructure at scale.

Tanium has been named to the Forbes Cloud 100 list for six consecutive years and ranks on Fortune's list of the Best Large Workplaces in Technology. In fact, more than half of the Fortune 100 and the U.S. armed forces trust Tanium to protect people; defend data; secure systems; and see and control every endpoint, team, and workflow everywhere. That's the power of certainty.
